

# FGFT® High Impact Performance Composite Maritime

Item no.: HIPC-25GFUV-NA01-X-XX

## Technical information

Description	Method	Typical value
Specific gravity	ISO 1183	1,08 g/cc
MFI 230 °C/ 2,16 kg	ISO 1133	1,74 gr/ 10 min
Tensile modulus (E)	ISO 527	3254 MPa
Tensile strength at max. force	ISO 527	43,31 MPa
Tensile strength at break	ISO 527	40,38 MPa
Elongation at break	ISO 527	%
Impact strength – charpy method 23 °C	ISO 179	28,2 kJ/m2
Vicat B 10N	ISO 306	°C
Vicat B 50N	ISO 306	°C

FGFT® High Impact Performance Composite, with UV & Antifouling, is an advanced engineered material designed to provide superior impact resistance, structural strength, and durability while maintaining a lightweight structure. The composite construction enables efficient energy absorption and distribution, helps reduce damage from mechanical loads, impacts, and repeated stress.

### Material features:

- Low warpage formulation
- High strength and durability
- Lightweight
- Smooth finish
- Customizable design / colour
- Strong layer adhesion

Printing recommendations	
Pre-drying	85 °C
Zone 1 temperature	°C
Zone 2 temperature	°C
Zone 3 temperature	°C
Zone 4 temperature	°C
Mass temperature	°C
Die temperature	°C
Max. moisture content	%

### Applications:

- Industrial equipment protection
- Lightweight structural elements
- 3D printed maritime.

### Additional information:

- Store cool and dry (15-25 °C)
- Available in cylindricals
- For FGF applications
- No drying needed if stored properly

All raw materials used in the production of products are in conformity with the REACH regulation (EC) no. 1907/2006.

**Disclaimer:** All above-mentioned data have been carefully checked according specific testing procedures and/or based on of raw material data and experience with compatible formulations. The data are provided for informational purposes only.

Therefore, no guarantee or warranty can be expected from these data. They are part of the quality and delivery specifications.

The applicability of the product should be tested under local processing conditions at the converter.
